

The leader in above-ground solar cable management

CAB Solar's patented, above-ground cable management system with integrated grounding utilizes an engineered messenger wire as both a support structure for cable hangers and electrical cables, and as an equipment grounding conductor.

CAB Solar's integrated grounding system eliminates the need to run a separate grounding conductor as well as the need to install grounding jumpers at every mid-pier.

In conjunction with CAB Solar's custom-designed multi-carrier cable hangers, installation of this system is quick, simple, and straightforward regardless of the type of utility scale solar project.

CAB Solar's integrated grounding system is ETL listed and conforms to the requirements of UL STD 2703 and is certified to STD CSA T.I.L. A-40 (Canada).

Above-Ground Cable Management with Integrated Grounding

The system promises significant savings throughout a PV system's life, simplifying the processes of installation, and operations and maintenance.

— *pv magazine*

- :: Reduces installation time
- :: Requires no special tools
- :: Saves on labor and materials
- :: Cuts engineering costs
- :: Provides GEC and EGC options
- :: Simplifies electrical design

Contact our Solar Team at **814.472.5077** to learn more about Integrated Grounding solution or for information about our full range of CAB Solar cable management products.

CAB Solar Hangers are manufactured from galvanized, high-tensile strength spring steel for maximum strength and corrosion resistance. A strong, durable PVC coating, applied to the entire hanger, makes them completely insulated and protected in highly corrosive environments. In addition to being flame retardant, chemical resistant, and UV stabilized, the outer coating will not damage cables.

CAB Solar Cable Management products are ideal for tracker, ballasted or fixed installations. CAB multi-carrier hangers safely separate bundles of cables to meet NEC requirements. Numerous standard designs are offered to safely support large bundles of string wires, DC feeders, as well as AC, data or other cabling. Custom hanger configurations are available to meet specific project requirements.

CAB® Solar products are manufactured by the Cambria County Association for the Blind and Handicapped. CAB® Solar provides employment opportunities and foster independence for individuals with disabilities in Cambria County, Pennsylvania, USA.
