

The leader in above-ground
solar cable management

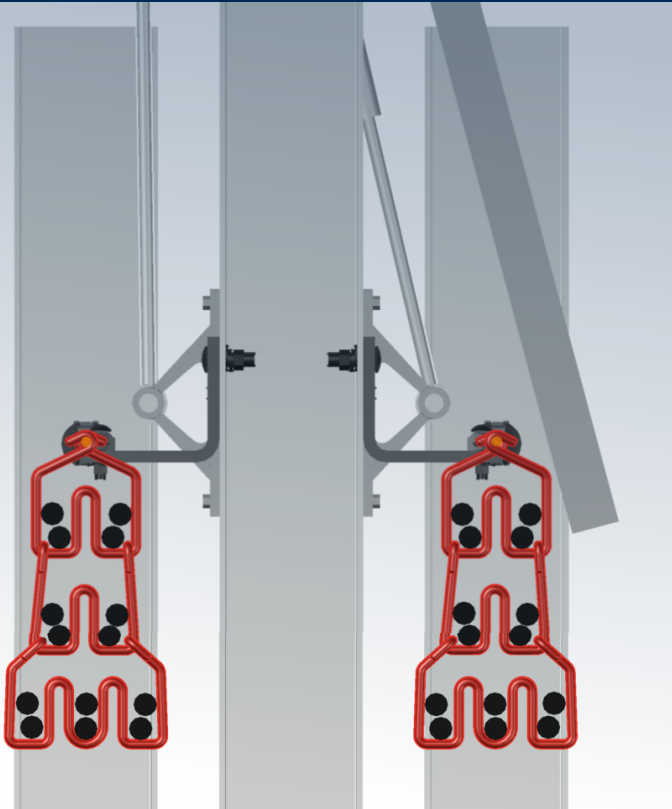

Introducing the **ModulAir™ Hail Stow Hanger System**, a cable management solution specially designed to accommodate the steep tilt angles of the solar industry's hail stow tracking systems. Engineered to seamlessly integrate with any tracking system, the ModulAir™ Hail Stow Hanger System optimizes limited space and enhances clearance windows for efficient cable management. Crafted from galvanized steel with a custom coating, this hanging system is scalable and customizable to meet the unique needs of any project. An ideal solution for project managers, engineers, and installers, the ModulAir™ Hail Stow Hanger System was created with top tracker manufacturers' new designs in mind for maximum compatibility and performance. The ModulAir™ Hail Stow Hanger System also allows for easy integration with CAB® Solar's existing cable management solutions, providing a comprehensive and efficient system for managing any utility-scale solar installation.

- :: Compatible with any hail stow tracking system
- :: Tapered design allows steeper panel tilts
- :: Available in two sizes for various cabling needs
- :: Scalable to meet the needs of any project

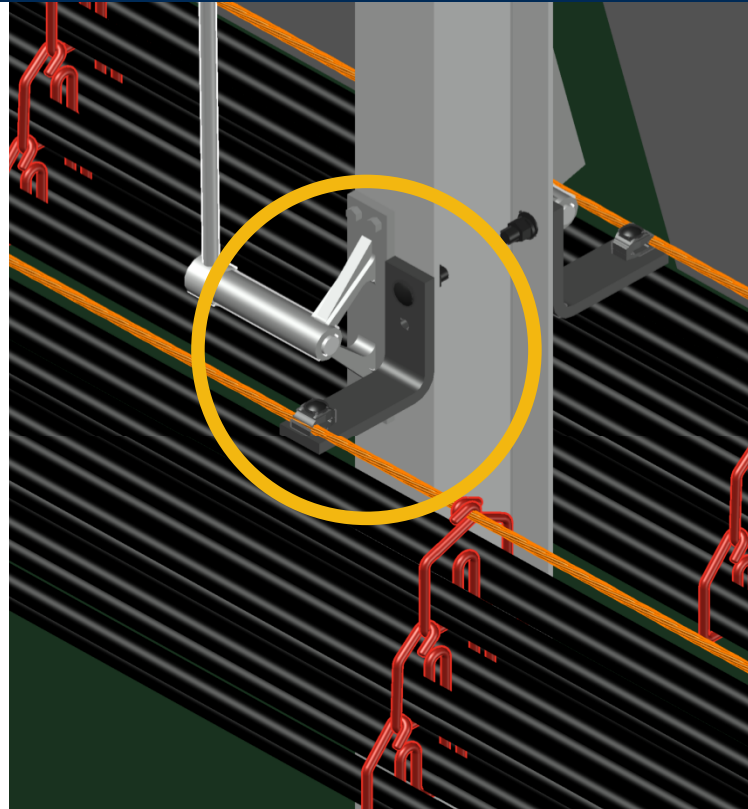

ModulAir™ Hail Stow Hanger System

Discover the superior efficiency and reliability of the ModulAir™ Hail Stow Hanger System for your next utility-scale solar project. Learn more about this comprehensive cable management solution at CABSolar.com.

Available in two versatile sizes, these hangers accommodate a diverse range of cable diameters and configurations, ensuring maximum flexibility and adaptability.

The ModulAir™ Hail Stow Hanger System includes a narrower messenger wire L-bracket compatible with a steeper tilted panel. The L-bracket integrates with the panel's damper arm hardware.
